Note: 1. In accordance with UNESCO's definition, Net Enrollment Rate and the data from school year 2008 above were revised into Total Net Enrollment Rate, Total Net Enrollment Rate= total number of students of the official age group at all levels of education + total number of corresponding population for a given level of education × 100%. Net Enrollment Rate = total number of students of the official age group for a given level of education ÷ total number of corresponding population for a given level of education × 100%. Net Enrollment Rate in tertiary education includes religious colleges' student.

2. Since the "Early Childhood Education and Care Act" was fulfilled in 2012, the kindergartens and the child-care centers were reformed to the "Preschools" from the SY 2012-2013.

3. Net enrollment rate of students in the primary school aged 6 to 11 (de jure population) = number of school-age students in the primary school aged 6 to 11 ÷ number of permanent school-age children aged 6 to 11.
