Intensive Course in Occupational Epidemiology

May 23–28, 1993, Wermelskirchen, Germany

The Intensive Course in Occupational Epidemiology (ICOE) is a five-day instructional course in the concepts, approaches, methods, analysis and interpretation of occupational epidemiological research. It is specifically designed to provide occupational physicians and other interested health professionals with the essential background necessary for critically reading and interpreting published epidemiological research, designing basic epidemiological studies, as well as assembling and analyzing data pertaining to the health of worker populations.

ICOE Faculty:

Professor Harvey Checkoway, Professor Carol Bigelow,
* Dr. William Halperin, * Dr. Sylvaine Cordier,
Dr. William Fayerweather, Dr. Kenneth A. Mundt

* pending confirmation

Course topics:

The Epidemiological Perspective, History of Occupational Epidemiology, Occupational Study Design Options, Basic Analytical Techniques, Preventing Bias in Occupational Studies, Statistical Control of Confounding, Interpreting Statistical Results, Epidemiological Surveillance in the Workplace, Basic Occupational Health Data Analysis, Critical Assessment of Published Occupational Studies

For further informations please contact:
Dr. Kenneth A. Mundt, ICOE Director
Walter Dieckmann, Dipl. rer. soc., ICOE Manager
